

You are required to produce a **written report** containing the following information :

1. **What is life cycle assessment?**
2. **Why do a life cycle assessment?**
3. **What stages** are taken into account?
4. **What results** will I analyze? **How** will I **analyze** these results?
5. **Select a product.** And **give the results** of its life-cycle analysis (I want **quantitative data**!).

Comment with your own analysis.

Save this document as a .pdf file in your H:Work folder.
