

## The Fablab Charter

**Project :** Introduce your own fablab by using a slide show.

### 1) What is a fab lab? What does it mean ?

Introduce and give a global definition of a fablab.

### 2) What's in a fab lab and what does it provide ?

Give an evolving inventory of core capabilities we find in your fablab to make our ideas concrete : Operational, educational, technical, financial, and logistical assistance... Tell us also who can we find there to help us.

### 3) Who can use your fab lab?

Who can come to your lab. What type of businesses do your target ?

### 4) What are your responsibilities?

As the boss of your lab, what are your missions ?

Ex : safety: not hurting people or machines

Ex : operations: assisting with cleaning, maintaining, and improving the lab

### 5) Show us examples of products your lab has created ?

Designs and processes developed in fab labs that can be protected and sold.

### 6) How is your fablab green ?

Name the eco-friendly actions you lead so that your lab can be considered as green.

### Critères d'évaluation :

- |                                      |    |
|--------------------------------------|----|
| - Définir ce qu'est un fablab        | /2 |
| - La syntaxe (formation des phrases) | /3 |
| - La prononciation                   | /2 |
| - Aisance à l'oral (mots-clés)       | /2 |
| - Le lexique est technique           | /2 |
| - Présenter un fablab écologique     | /3 |
| - Être convaincant                   | /2 |
| - Répondre à la charte du Fablab     | /4 |
